Existing StackRadar Infrastructure
FRONTEND
StackRadar Frontend
Web-based dashboard for monitoring agent reliability, security
React
Tailwind CSS
TypeScript
User Request
API GATEWAY
StackRadar Backend API
Entry point for agent requests, handling authentication and routing
FastAPI
Kong
SERVICE
Data Collector (Existing)
Fetches data from external sources like GitHub and StackOverflow.
Node.js
Axios
Cheerio
Store Data
DATABASE
StackRadar DB (Existing)
Stores core data
Security Check
StackRadar DB (Existing)
Process Task
SERVICE
AI Processor (Existing)
Processes collected data using AI to generate insights and scores.
Python
OpenAI SDK
Read/Write
LLM Call
SERVICE
LLM API
External LLM Provider for generation
